DETAILED ACTION

Amendment

1. Receipt is acknowledged of the Amendment filed September 14, 2007.

Allowable Subject Matter

3. Claims 1-12 are allowable over prior art.

The following is an examiner's for allowance: Although prior art teaches an IC card which includes a holder for storing digital contents and methods of protecting the stored digital contents, the above identified prior art of record, taken alone, or in combination with any other prior art, fails to teach or fairly suggest the specific features of claims 1-12 of the present claimed invention. Specifically prior art fails to teach the IC card including a holder configured to store first *created* digital contents, an encryption processor, and an execution processor. The claimed execution processor is configured to create the first digital contents when a create right of the first digital contents is acknowledged. Once the card receives an acknowledgment the first digital contents are created. Prior art instead discloses that the protected digital contents are already created and stored in a memory. Therefore, the above limitations are not specifically taught in prior art and moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.
